QUESTION 1 | MARLIN TEST 1 | READING
Marlin Test 01 - Exercise 001. When did the vessel arrive?
Passage:
The vessel arrived at Port Alpha at 0700. Cargo inspection began at 0800 and finished at 1030. All seals were intact. Departure was scheduled for 1400.
Options:
- 0800
- 1400
- 0700
- 1030
CORRECT ANSWER: 0700
Explanation: The answer is stated in the passage.

QUESTION 2 | MARLIN TEST 1 | READING
Marlin Test 01 - Exercise 005. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.
Options:
- It should be mixed with food waste
- It should be kept for proper disposal
- It should be thrown into the sea
- It should be burned on deck
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 3 | MARLIN TEST 1 | READING
Marlin Test 01 - Exercise 006. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Position, traffic, weather and defects
- Only the meal schedule
- Only crew leave plans
- Only cargo prices
CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 4 | MARLIN TEST 1 | READING
Marlin Test 01 - Exercise 002. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.

Options:
- Informed the chief engineer
- Ignored the leak
- Restarted the pump
- Opened a sea valve
CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 5 | MARLIN TEST 1 | READING
Marlin Test 01 - Exercise 003. Why was loose equipment secured?
Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:
- Cargo was missing
- The crew changed uniforms
- The ship entered dry dock
- Strong winds were expected
CORRECT ANSWER: Strong winds were expected
Explanation: The answer is stated in the passage.

QUESTION 6 | MARLIN TEST 1 | READING
Marlin Test 01 - Exercise 004. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- The engine serial number
- The port tax rate
- Her assigned muster station
- The cargo invoice
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 7 | MARLIN TEST 2 | READING
Marlin Test 02 - Exercise 008. What caused the low tank level?
Passage:
The freshwater tank level was lower than expected. The engineer checked the record and found a transfer valve partly open. The valve was closed and the level monitored.
Options:
- The tank was newly painted
- A transfer valve was partly open
- The weather was cold
- The ship moved too slowly
CORRECT ANSWER: A transfer valve was partly open
Explanation: The answer is stated in the passage.

QUESTION 8 | MARLIN TEST 2 | READING
Marlin Test 02 - Exercise 009. How long was pilot boarding delayed?
Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- One hour
- Fifteen minutes
- Thirty minutes
- Two hours
CORRECT ANSWER: Thirty minutes
Explanation: The answer is stated in the passage.

QUESTION 9 | MARLIN TEST 2 | READING
Marlin Test 02 - Exercise 010. What was the purpose of the toolbox talk?
Passage:
Before cargo work, the chief officer held a toolbox talk about signals, safe access, PPE and stop-work authority. Every team member could ask questions.
Options:
- To change the ship’s name
- To calculate passenger fares
- To announce a sports event
- To review hazards and safe working arrangements
CORRECT ANSWER: To review hazards and safe working arrangements
Explanation: The answer is stated in the passage.

QUESTION 10 | MARLIN TEST 2 | READING
Marlin Test 02 - Exercise 011. When did the vessel arrive?
Passage:
The vessel arrived at Port Alpha at 0700. Cargo inspection began at 0800 and finished at 1030. All seals were intact. Departure was scheduled for 1400.
Options:
- 0700
- 1400
- 1030
- 0800
CORRECT ANSWER: 0700
Explanation: The answer is stated in the passage.

QUESTION 11 | MARLIN TEST 2 | READING
Marlin Test 02 - Exercise 012. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.
Options:

- Restarted the pump
- Opened a sea valve
- Informed the chief engineer
- Ignored the leak
CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 12 | MARLIN TEST 2 | READING
Marlin Test 02 - Exercise 007. Where did the crew report?
Passage:
A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to muster stations. The fire team wore protective equipment.
Options:
- Their muster stations
- The shore gate
- The engine workshop
- The cargo office
CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 13 | MARLIN TEST 3 | READING
Marlin Test 03 - Exercise 017. Where did the crew report?
Passage:
A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to muster stations. The fire team wore protective equipment.
Options:
- The cargo office
- The shore gate
- The engine workshop

CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 21 | MARLIN TEST 5 | READING
Marlin Test 05 - Exercise 029. How long was pilot boarding delayed?
Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- Fifteen minutes
- Thirty minutes
- Two hours
- One hour
CORRECT ANSWER: Thirty minutes
Explanation: The answer is stated in the passage.

QUESTION 22 | MARLIN TEST 5 | READING

Marlin Test 05 - Exercise 026. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Position, traffic, weather and defects
- Only the meal schedule
- Only crew leave plans
- Only cargo prices
CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 23 | MARLIN TEST 6 | READING
Marlin Test 06 - Exercise 037. Where did the crew report?
Passage:
A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to muster stations. The fire team wore protective equipment.
Options:
- Their muster stations
- The cargo office
- The shore gate
- The engine workshop
CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 24 | MARLIN TEST 6 | READING
Marlin Test 06 - Exercise 035. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.
Options:
- It should be burned on deck
- It should be mixed with food waste
- It should be kept for proper disposal
- It should be thrown into the sea
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 25 | MARLIN TEST 6 | READING
Marlin Test 06 - Exercise 036. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Only cargo prices
- Position, traffic, weather and defects

- Only the meal schedule
- Only crew leave plans
CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 26 | MARLIN TEST 6 | READING
Marlin Test 06 - Exercise 038. What caused the low tank level?
Passage:
The freshwater tank level was lower than expected. The engineer checked the record and found a transfer valve partly open. The valve was closed and the level monitored.
Options:
- The tank was newly painted
- The ship moved too slowly
- The weather was cold
- A transfer valve was partly open
CORRECT ANSWER: A transfer valve was partly open
Explanation: The answer is stated in the passage.

QUESTION 27 | MARLIN TEST 6 | READING
Marlin Test 06 - Exercise 039. How long was pilot boarding delayed?
Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- Thirty minutes
- One hour
- Two hours
- Fifteen minutes
CORRECT ANSWER: Thirty minutes
Explanation: The answer is stated in the passage.

QUESTION 28 | MARLIN TEST 6 | READING
Marlin Test 06 - Exercise 040. What was the purpose of the toolbox talk?
Passage:
Before cargo work, the chief officer held a toolbox talk about signals, safe access, PPE and stop-work authority. Every team member could ask questions.
Options:
- To announce a sports event
- To review hazards and safe working arrangements
- To calculate passenger fares
- To change the ship’s name
CORRECT ANSWER: To review hazards and safe working arrangements
Explanation: The answer is stated in the passage.

QUESTION 29 | MARLIN TEST 6 | READING
Marlin Test 06 - Exercise 033. Why was loose equipment secured?

Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:
- Strong winds were expected
- The ship entered dry dock
- Cargo was missing
- The crew changed uniforms
CORRECT ANSWER: Strong winds were expected
Explanation: The answer is stated in the passage.

QUESTION 30 | MARLIN TEST 7 | READING
Marlin Test 07 - Exercise 043. Why was loose equipment secured?
Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:
- Cargo was missing
- The crew changed uniforms
- Strong winds were expected
- The ship entered dry dock
CORRECT ANSWER: Strong winds were expected
Explanation: The answer is stated in the passage.

QUESTION 31 | MARLIN TEST 7 | READING
Marlin Test 07 - Exercise 044. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- Her assigned muster station
- The engine serial number
- The cargo invoice
- The port tax rate
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 32 | MARLIN TEST 7 | READING
Marlin Test 07 - Exercise 049. How long was pilot boarding delayed?
Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- Fifteen minutes

Explanation: The answer is stated in the passage.

QUESTION 33 | MARLIN TEST 7 | READING
Marlin Test 07 - Exercise 050. What was the purpose of the toolbox talk?
Passage:
Before cargo work, the chief officer held a toolbox talk about signals, safe access, PPE and stop-work authority. Every team member could ask questions.
Options:
- To review hazards and safe working arrangements
- To change the ship’s name
- To calculate passenger fares
- To announce a sports event
CORRECT ANSWER: To review hazards and safe working arrangements
Explanation: The answer is stated in the passage.

QUESTION 34 | MARLIN TEST 7 | READING
Marlin Test 07 - Exercise 047. Where did the crew report?
Passage:
A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to muster stations. The fire team wore protective equipment.
Options:
- The engine workshop
- Their muster stations
- The cargo office
- The shore gate
CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 35 | MARLIN TEST 7 | READING
Marlin Test 07 - Exercise 045. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.
Options:
- It should be thrown into the sea
- It should be mixed with food waste
- It should be burned on deck
- It should be kept for proper disposal
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 36 | MARLIN TEST 7 | READING
Marlin Test 07 - Exercise 046. What was included in the handover?
Passage:

At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Only crew leave plans
- Only cargo prices
- Position, traffic, weather and defects
- Only the meal schedule
CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 37 | MARLIN TEST 7 | READING
Marlin Test 07 - Exercise 048. What caused the low tank level?
Passage:
The freshwater tank level was lower than expected. The engineer checked the record and found a transfer valve partly open. The valve was closed and the level monitored.
Options:
- A transfer valve was partly open
- The tank was newly painted
- The ship moved too slowly
- The weather was cold
CORRECT ANSWER: A transfer valve was partly open
Explanation: The answer is stated in the passage.

QUESTION 38 | MARLIN TEST 7 | READING
Marlin Test 07 - Exercise 041. When did the vessel arrive?
Passage:
The vessel arrived at Port Alpha at 0700. Cargo inspection began at 0800 and finished at 1030. All seals were intact. Departure was scheduled for 1400.
Options:
- 1030
- 1400
- 0800
- 0700
CORRECT ANSWER: 0700
Explanation: The answer is stated in the passage.

QUESTION 39 | MARLIN TEST 7 | READING
Marlin Test 07 - Exercise 042. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.
Options:
- Informed the chief engineer
- Opened a sea valve
- Ignored the leak
- Restarted the pump

CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 40 | MARLIN TEST 8 | READING
Marlin Test 08 - Exercise 052. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.
Options:
- Ignored the leak
- Opened a sea valve
- Restarted the pump
- Informed the chief engineer
CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 41 | MARLIN TEST 8 | READING
Marlin Test 08 - Exercise 056. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Only the meal schedule
- Only cargo prices
- Only crew leave plans
- Position, traffic, weather and defects
CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 42 | MARLIN TEST 8 | READING
Marlin Test 08 - Exercise 058. What caused the low tank level?
Passage:
The freshwater tank level was lower than expected. The engineer checked the record and found a transfer valve partly open. The valve was closed and the level monitored.
Options:
- The weather was cold
- A transfer valve was partly open
- The tank was newly painted
- The ship moved too slowly
CORRECT ANSWER: A transfer valve was partly open
Explanation: The answer is stated in the passage.

QUESTION 43 | MARLIN TEST 8 | READING
Marlin Test 08 - Exercise 053. Why was loose equipment secured?
Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:

- Strong winds were expected
- The crew changed uniforms
- The ship entered dry dock
- Cargo was missing
CORRECT ANSWER: Strong winds were expected
Explanation: The answer is stated in the passage.

QUESTION 44 | MARLIN TEST 8 | READING
Marlin Test 08 - Exercise 057. Where did the crew report?
Passage:
A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to muster stations. The fire team wore protective equipment.
Options:
- The shore gate
- The engine workshop
- Their muster stations
- The cargo office
CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 45 | MARLIN TEST 8 | READING
Marlin Test 08 - Exercise 055. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.
Options:
- It should be kept for proper disposal
- It should be burned on deck
- It should be thrown into the sea
- It should be mixed with food waste
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 46 | MARLIN TEST 8 | READING
Marlin Test 08 - Exercise 059. How long was pilot boarding delayed?
Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- Thirty minutes
- Fifteen minutes
- One hour
- Two hours
CORRECT ANSWER: Thirty minutes
Explanation: The answer is stated in the passage.

QUESTION 47 | MARLIN TEST 8 | READING
Marlin Test 08 - Exercise 060. What was the purpose of the toolbox talk?
Passage:
Before cargo work, the chief officer held a toolbox talk about signals, safe access, PPE and stop-work authority. Every team member could ask questions.
Options:
- To announce a sports event
- To change the ship’s name
- To calculate passenger fares
- To review hazards and safe working arrangements
CORRECT ANSWER: To review hazards and safe working arrangements
Explanation: The answer is stated in the passage.

QUESTION 48 | MARLIN TEST 8 | READING
Marlin Test 08 - Exercise 054. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- The cargo invoice
- The port tax rate
- Her assigned muster station
- The engine serial number
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 49 | MARLIN TEST 8 | READING
Marlin Test 08 - Exercise 051. When did the vessel arrive?
Passage:
The vessel arrived at Port Alpha at 0700. Cargo inspection began at 0800 and finished at 1030. All seals were intact. Departure was scheduled for 1400.
Options:
- 1030
- 0800
- 0700
- 1400
CORRECT ANSWER: 0700
Explanation: The answer is stated in the passage.

QUESTION 50 | MARLIN TEST 9 | READING
Advanced scenario 09-04. Exercise 054. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- The cargo invoice

- The port tax rate
- Her assigned muster station
- The engine serial number
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 51 | MARLIN TEST 9 | READING
Advanced scenario 09-09. Exercise 040. What was the purpose of the toolbox talk?
Passage:
Before cargo work, the chief officer held a toolbox talk about signals, safe access, PPE and stop-work authority. Every team member could ask questions.
Options:
- To announce a sports event
- To review hazards and safe working arrangements
- To calculate passenger fares
- To change the ship’s name
CORRECT ANSWER: To review hazards and safe working arrangements
Explanation: The answer is stated in the passage.

QUESTION 52 | MARLIN TEST 9 | READING
Advanced scenario 09-05. Exercise 052. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.
Options:
- Ignored the leak
- Opened a sea valve
- Restarted the pump
- Informed the chief engineer
CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 53 | MARLIN TEST 9 | READING
Advanced scenario 09-06. Exercise 003. Why was loose equipment secured?
Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:
- Cargo was missing
- The crew changed uniforms
- The ship entered dry dock
- Strong winds were expected
CORRECT ANSWER: Strong winds were expected
Explanation: The answer is stated in the passage.

QUESTION 54 | MARLIN TEST 9 | READING

Advanced scenario 09-07. Exercise 047. Where did the crew report?
Passage:
A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to muster stations. The fire team wore protective equipment.
Options:
- The engine workshop
- Their muster stations
- The cargo office
- The shore gate
CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 55 | MARLIN TEST 9 | READING
Advanced scenario 09-02. Exercise 009. How long was pilot boarding delayed?
Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- One hour
- Fifteen minutes
- Thirty minutes
- Two hours
CORRECT ANSWER: Thirty minutes
Explanation: The answer is stated in the passage.

QUESTION 56 | MARLIN TEST 9 | READING
Advanced scenario 09-01. Exercise 004. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- The engine serial number
- The port tax rate
- Her assigned muster station
- The cargo invoice
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 57 | MARLIN TEST 9 | READING
Advanced scenario 09-03. Exercise 056. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Only the meal schedule
- Only cargo prices
- Only crew leave plans
- Position, traffic, weather and defects

CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 58 | MARLIN TEST 9 | READING
Advanced scenario 09-08. Exercise 028. What caused the low tank level?
Passage:
The freshwater tank level was lower than expected. The engineer checked the record and found a transfer valve partly open. The valve was closed and the level monitored.
Options:
- A transfer valve was partly open
- The ship moved too slowly
- The weather was cold
- The tank was newly painted
CORRECT ANSWER: A transfer valve was partly open
Explanation: The answer is stated in the passage.

QUESTION 59 | MARLIN TEST 9 | READING
Advanced scenario 09-10. Exercise 032. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.
Options:
- Restarted the pump
- Opened a sea valve
- Informed the chief engineer
- Ignored the leak
CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 60 | MARLIN TEST 10 | READING
Advanced scenario 10-09. Exercise 046. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Only crew leave plans
- Only cargo prices
- Position, traffic, weather and defects
- Only the meal schedule
CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 61 | MARLIN TEST 10 | READING
Advanced scenario 10-05. Exercise 027. Where did the crew report?
Passage:
A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to

muster stations. The fire team wore protective equipment.
Options:
- The cargo office
- The shore gate
- The engine workshop
- Their muster stations
CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 62 | MARLIN TEST 10 | READING
Advanced scenario 10-10. Exercise 053. Why was loose equipment secured?
Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:
- Strong winds were expected
- The crew changed uniforms
- The ship entered dry dock
- Cargo was missing
CORRECT ANSWER: Strong winds were expected
Explanation: The answer is stated in the passage.

QUESTION 63 | MARLIN TEST 10 | READING
Advanced scenario 10-03. Exercise 041. When did the vessel arrive?
Passage:
The vessel arrived at Port Alpha at 0700. Cargo inspection began at 0800 and finished at 1030. All seals were intact. Departure was scheduled for 1400.
Options:
- 1030
- 1400
- 0800
- 0700
CORRECT ANSWER: 0700
Explanation: The answer is stated in the passage.

QUESTION 64 | MARLIN TEST 10 | READING
Advanced scenario 10-02. Exercise 013. Why was loose equipment secured?
Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:
- Cargo was missing
- The crew changed uniforms
- The ship entered dry dock
- Strong winds were expected
CORRECT ANSWER: Strong winds were expected

Explanation: The answer is stated in the passage.

QUESTION 65 | MARLIN TEST 10 | READING
Advanced scenario 10-06. Exercise 033. Why was loose equipment secured?
Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:
- Strong winds were expected
- The ship entered dry dock
- Cargo was missing
- The crew changed uniforms
CORRECT ANSWER: Strong winds were expected
Explanation: The answer is stated in the passage.

QUESTION 66 | MARLIN TEST 10 | READING
Advanced scenario 10-01. Exercise 015. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.
Options:
- It should be mixed with food waste
- It should be kept for proper disposal
- It should be thrown into the sea
- It should be burned on deck
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 67 | MARLIN TEST 10 | READING
Advanced scenario 10-04. Exercise 035. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.
Options:
- It should be burned on deck
- It should be mixed with food waste
- It should be kept for proper disposal
- It should be thrown into the sea
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 68 | MARLIN TEST 10 | READING
Advanced scenario 10-07. Exercise 044. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- Her assigned muster station

- The engine serial number
- The cargo invoice
- The port tax rate
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 69 | MARLIN TEST 10 | READING
Advanced scenario 10-08. Exercise 016. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Position, traffic, weather and defects
- Only the meal schedule
- Only crew leave plans
- Only cargo prices
CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 70 | MARLIN TEST 11 | READING
Advanced scenario 11-06. Exercise 029. How long was pilot boarding delayed?
Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- Fifteen minutes
- Thirty minutes
- Two hours
- One hour
CORRECT ANSWER: Thirty minutes
Explanation: The answer is stated in the passage.

QUESTION 71 | MARLIN TEST 11 | READING
Advanced scenario 11-02. Exercise 036. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Only cargo prices
- Position, traffic, weather and defects
- Only the meal schedule
- Only crew leave plans
CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 72 | MARLIN TEST 11 | READING

Advanced scenario 11-11. Exercise 023. Why was loose equipment secured?
Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:
- Strong winds were expected
- The ship entered dry dock
- Cargo was missing
- The crew changed uniforms
CORRECT ANSWER: Strong winds were expected
Explanation: The answer is stated in the passage.

QUESTION 73 | MARLIN TEST 11 | READING
Advanced scenario 11-03. Exercise 031. When did the vessel arrive?
Passage:
The vessel arrived at Port Alpha at 0700. Cargo inspection began at 0800 and finished at 1030. All seals were intact. Departure was scheduled for 1400.
Options:
- 0700
- 1400
- 1030
- 0800
CORRECT ANSWER: 0700
Explanation: The answer is stated in the passage.

QUESTION 74 | MARLIN TEST 11 | READING
Advanced scenario 11-10. Exercise 005. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.
Options:
- It should be mixed with food waste
- It should be kept for proper disposal
- It should be thrown into the sea
- It should be burned on deck
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 75 | MARLIN TEST 11 | READING
Advanced scenario 11-09. Exercise 058. What caused the low tank level?
Passage:
The freshwater tank level was lower than expected. The engineer checked the record and found a transfer valve partly open. The valve was closed and the level monitored.
Options:
- The weather was cold
- A transfer valve was partly open

- The tank was newly painted
- The ship moved too slowly
CORRECT ANSWER: A transfer valve was partly open
Explanation: The answer is stated in the passage.

QUESTION 76 | MARLIN TEST 11 | READING
Advanced scenario 11-12. Exercise 050. What was the purpose of the toolbox talk?
Passage:
Before cargo work, the chief officer held a toolbox talk about signals, safe access, PPE and stop-work authority. Every team member could ask questions.
Options:
- To review hazards and safe working arrangements
- To change the ship’s name
- To calculate passenger fares
- To announce a sports event
CORRECT ANSWER: To review hazards and safe working arrangements
Explanation: The answer is stated in the passage.

QUESTION 77 | MARLIN TEST 11 | READING
Advanced scenario 11-04. Exercise 014. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- The engine serial number
- The port tax rate
- Her assigned muster station
- The cargo invoice
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 78 | MARLIN TEST 11 | READING
Advanced scenario 11-05. Exercise 017. Where did the crew report?
Passage:
A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to muster stations. The fire team wore protective equipment.
Options:
- The cargo office
- The shore gate
- The engine workshop
- Their muster stations
CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 79 | MARLIN TEST 11 | READING
Advanced scenario 11-01. Exercise 011. When did the vessel arrive?

Passage:
The vessel arrived at Port Alpha at 0700. Cargo inspection began at 0800 and finished at 1030. All seals were intact. Departure was scheduled for 1400.
Options:
- 0700
- 1400
- 1030
- 0800
CORRECT ANSWER: 0700
Explanation: The answer is stated in the passage.

QUESTION 80 | MARLIN TEST 11 | READING
Advanced scenario 11-08. Exercise 060. What was the purpose of the toolbox talk?
Passage:
Before cargo work, the chief officer held a toolbox talk about signals, safe access, PPE and stop-work authority. Every team member could ask questions.
Options:
- To announce a sports event
- To change the ship’s name
- To calculate passenger fares
- To review hazards and safe working arrangements
CORRECT ANSWER: To review hazards and safe working arrangements
Explanation: The answer is stated in the passage.

QUESTION 81 | MARLIN TEST 11 | READING
Advanced scenario 11-13. Exercise 012. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.
Options:
- Restarted the pump
- Opened a sea valve
- Informed the chief engineer
- Ignored the leak
CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 82 | MARLIN TEST 11 | READING
Advanced scenario 11-07. Exercise 034. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- The cargo invoice
- The port tax rate
- The engine serial number
- Her assigned muster station
CORRECT ANSWER: Her assigned muster station

Explanation: The answer is stated in the passage.

QUESTION 83 | MARLIN TEST 12 | READING
Advanced scenario 12-07. Exercise 021. When did the vessel arrive?
Passage:
The vessel arrived at Port Alpha at 0700. Cargo inspection began at 0800 and finished at 1030. All seals were intact. Departure was scheduled for 1400.
Options:
- 0700
- 1400
- 1030
- 0800
CORRECT ANSWER: 0700
Explanation: The answer is stated in the passage.

QUESTION 84 | MARLIN TEST 12 | READING
Advanced scenario 12-10. Exercise 008. What caused the low tank level?
Passage:
The freshwater tank level was lower than expected. The engineer checked the record and found a transfer valve partly open. The valve was closed and the level monitored.
Options:
- The tank was newly painted
- A transfer valve was partly open
- The weather was cold
- The ship moved too slowly
CORRECT ANSWER: A transfer valve was partly open
Explanation: The answer is stated in the passage.

QUESTION 85 | MARLIN TEST 12 | READING
Advanced scenario 12-05. Exercise 018. What caused the low tank level?
Passage:
The freshwater tank level was lower than expected. The engineer checked the record and found a transfer valve partly open. The valve was closed and the level monitored.
Options:
- A transfer valve was partly open
- The ship moved too slowly
- The weather was cold
- The tank was newly painted
CORRECT ANSWER: A transfer valve was partly open
Explanation: The answer is stated in the passage.

QUESTION 86 | MARLIN TEST 12 | READING
Advanced scenario 12-06. Exercise 025. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.

Options:
- It should be mixed with food waste
- It should be kept for proper disposal
- It should be thrown into the sea
- It should be burned on deck
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 87 | MARLIN TEST 12 | READING
Advanced scenario 12-11. Exercise 042. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.
Options:
- Informed the chief engineer
- Opened a sea valve
- Ignored the leak
- Restarted the pump
CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 88 | MARLIN TEST 12 | READING
Advanced scenario 12-02. Exercise 048. What caused the low tank level?
Passage:
The freshwater tank level was lower than expected. The engineer checked the record and found a transfer valve partly open. The valve was closed and the level monitored.
Options:
- A transfer valve was partly open
- The tank was newly painted
- The ship moved too slowly
- The weather was cold
CORRECT ANSWER: A transfer valve was partly open
Explanation: The answer is stated in the passage.

QUESTION 89 | MARLIN TEST 12 | READING
Advanced scenario 12-01. Exercise 024. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- The cargo invoice
- The port tax rate
- The engine serial number
- Her assigned muster station
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 90 | MARLIN TEST 12 | READING
Advanced scenario 12-12. Exercise 059. How long was pilot boarding delayed?
Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- Thirty minutes
- Fifteen minutes
- One hour
- Two hours
CORRECT ANSWER: Thirty minutes
Explanation: The answer is stated in the passage.

QUESTION 91 | MARLIN TEST 12 | READING
Advanced scenario 12-03. Exercise 019. How long was pilot boarding delayed?
Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- One hour
- Fifteen minutes
- Thirty minutes
- Two hours
CORRECT ANSWER: Thirty minutes
Explanation: The answer is stated in the passage.

QUESTION 92 | MARLIN TEST 12 | READING
Advanced scenario 12-04. Exercise 039. How long was pilot boarding delayed?
Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- Thirty minutes
- One hour
- Two hours
- Fifteen minutes
CORRECT ANSWER: Thirty minutes
Explanation: The answer is stated in the passage.

QUESTION 93 | MARLIN TEST 12 | READING
Advanced scenario 12-13. Exercise 002. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.
Options:
- Informed the chief engineer
- Ignored the leak

- Restarted the pump
- Opened a sea valve
CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 94 | MARLIN TEST 12 | READING
Advanced scenario 12-09. Exercise 038. What caused the low tank level?
Passage:
The freshwater tank level was lower than expected. The engineer checked the record and found a transfer valve partly open. The valve was closed and the level monitored.
Options:
- The tank was newly painted
- The ship moved too slowly
- The weather was cold
- A transfer valve was partly open
CORRECT ANSWER: A transfer valve was partly open
Explanation: The answer is stated in the passage.

QUESTION 95 | MARLIN TEST 12 | READING
Advanced scenario 12-08. Exercise 010. What was the purpose of the toolbox talk?
Passage:
Before cargo work, the chief officer held a toolbox talk about signals, safe access, PPE and stop-work authority. Every team member could ask questions.
Options:
- To change the ship’s name
- To calculate passenger fares
- To announce a sports event
- To review hazards and safe working arrangements
CORRECT ANSWER: To review hazards and safe working arrangements
Explanation: The answer is stated in the passage.

QUESTION 96 | MARLIN TEST 13 | READING
Advanced scenario 13-11. Exercise 004. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- The engine serial number
- The port tax rate
- Her assigned muster station
- The cargo invoice
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 97 | MARLIN TEST 13 | READING
Advanced scenario 13-12. Exercise 009. How long was pilot boarding delayed?

Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- One hour
- Fifteen minutes
- Thirty minutes
- Two hours
CORRECT ANSWER: Thirty minutes
Explanation: The answer is stated in the passage.

QUESTION 98 | MARLIN TEST 13 | READING
Advanced scenario 13-13. Exercise 056. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Only the meal schedule
- Only cargo prices
- Only crew leave plans
- Position, traffic, weather and defects
CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 99 | MARLIN TEST 13 | READING
Advanced scenario 13-01. Exercise 045. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.
Options:
- It should be thrown into the sea
- It should be mixed with food waste
- It should be burned on deck
- It should be kept for proper disposal
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 100 | MARLIN TEST 13 | READING
Advanced scenario 13-02. Exercise 020. What was the purpose of the toolbox talk?
Passage:
Before cargo work, the chief officer held a toolbox talk about signals, safe access, PPE and stop-work authority. Every team member could ask questions.
Options:
- To change the ship’s name
- To calculate passenger fares
- To announce a sports event

- To review hazards and safe working arrangements
CORRECT ANSWER: To review hazards and safe working arrangements
Explanation: The answer is stated in the passage.

QUESTION 101 | MARLIN TEST 13 | READING
Advanced scenario 13-08. Exercise 007. Where did the crew report?
Passage:
A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to muster stations. The fire team wore protective equipment.
Options:
- Their muster stations
- The shore gate
- The engine workshop
- The cargo office
CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 102 | MARLIN TEST 13 | READING
Advanced scenario 13-03. Exercise 001. When did the vessel arrive?
Passage:
The vessel arrived at Port Alpha at 0700. Cargo inspection began at 0800 and finished at 1030. All seals were intact. Departure was scheduled for 1400.
Options:
- 0800
- 1400
- 0700
- 1030
CORRECT ANSWER: 0700
Explanation: The answer is stated in the passage.

QUESTION 103 | MARLIN TEST 13 | READING
Advanced scenario 13-07. Exercise 043. Why was loose equipment secured?
Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:
- Cargo was missing
- The crew changed uniforms
- Strong winds were expected
- The ship entered dry dock
CORRECT ANSWER: Strong winds were expected
Explanation: The answer is stated in the passage.

QUESTION 104 | MARLIN TEST 13 | READING
Advanced scenario 13-06. Exercise 057. Where did the crew report?
Passage:

A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to muster stations. The fire team wore protective equipment.
Options:
- The shore gate
- The engine workshop
- Their muster stations
- The cargo office
CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 105 | MARLIN TEST 13 | READING
Advanced scenario 13-04. Exercise 055. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.
Options:
- It should be kept for proper disposal
- It should be burned on deck
- It should be thrown into the sea
- It should be mixed with food waste
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 106 | MARLIN TEST 13 | READING
Advanced scenario 13-05. Exercise 026. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Position, traffic, weather and defects
- Only the meal schedule
- Only crew leave plans
- Only cargo prices
CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 107 | MARLIN TEST 13 | READING
Advanced scenario 13-extra-1. Exercise 004. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- The engine serial number
- The port tax rate
- Her assigned muster station
- The cargo invoice
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 108 | MARLIN TEST 13 | READING
Advanced scenario 13-extra-2. Exercise 009. How long was pilot boarding delayed?
Passage:
Pilot boarding was delayed by thirty minutes because of poor visibility. The master adjusted the arrival plan and informed the deck team.
Options:
- One hour
- Fifteen minutes
- Thirty minutes
- Two hours
CORRECT ANSWER: Thirty minutes
Explanation: The answer is stated in the passage.

QUESTION 109 | MARLIN TEST 14 | READING
Advanced scenario 14-08. Exercise 022. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.
Options:
- Restarted the pump
- Opened a sea valve
- Informed the chief engineer
- Ignored the leak
CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 110 | MARLIN TEST 14 | READING
Advanced scenario 14-02. Exercise 052. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.
Options:
- Ignored the leak
- Opened a sea valve
- Restarted the pump
- Informed the chief engineer
CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 111 | MARLIN TEST 14 | READING
Advanced scenario 14-01. Exercise 054. What did the cadet need to learn?
Passage:
A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:

- The cargo invoice
- The port tax rate
- Her assigned muster station
- The engine serial number
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 112 | MARLIN TEST 14 | READING
Advanced scenario 14-10. Exercise 037. Where did the crew report?
Passage:
A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to muster stations. The fire team wore protective equipment.
Options:
- Their muster stations
- The cargo office
- The shore gate
- The engine workshop
CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 113 | MARLIN TEST 14 | READING
Advanced scenario 14-09. Exercise 006. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Position, traffic, weather and defects
- Only the meal schedule
- Only crew leave plans
- Only cargo prices
CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 114 | MARLIN TEST 14 | READING
Advanced scenario 14-11. Exercise 015. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.
Options:
- It should be mixed with food waste
- It should be kept for proper disposal
- It should be thrown into the sea
- It should be burned on deck
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 115 | MARLIN TEST 14 | READING
Advanced scenario 14-12. Exercise 013. Why was loose equipment secured?
Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:
- Cargo was missing
- The crew changed uniforms
- The ship entered dry dock
- Strong winds were expected
CORRECT ANSWER: Strong winds were expected
Explanation: The answer is stated in the passage.

QUESTION 116 | MARLIN TEST 14 | READING
Advanced scenario 14-03. Exercise 003. Why was loose equipment secured?
Passage:
Strong winds were forecast after midnight. The master instructed the deck team to secure loose equipment before sunset and wear safety harnesses outside.
Options:
- Cargo was missing
- The crew changed uniforms
- The ship entered dry dock
- Strong winds were expected
CORRECT ANSWER: Strong winds were expected
Explanation: The answer is stated in the passage.

QUESTION 117 | MARLIN TEST 14 | READING
Advanced scenario 14-06. Exercise 040. What was the purpose of the toolbox talk?
Passage:
Before cargo work, the chief officer held a toolbox talk about signals, safe access, PPE and stop-work authority. Every team member could ask questions.
Options:
- To announce a sports event
- To review hazards and safe working arrangements
- To calculate passenger fares
- To change the ship’s name
CORRECT ANSWER: To review hazards and safe working arrangements
Explanation: The answer is stated in the passage.

QUESTION 118 | MARLIN TEST 14 | READING
Advanced scenario 14-05. Exercise 028. What caused the low tank level?
Passage:
The freshwater tank level was lower than expected. The engineer checked the record and found a transfer valve partly open. The valve was closed and the level monitored.
Options:
- A transfer valve was partly open
- The ship moved too slowly
- The weather was cold

- The tank was newly painted
CORRECT ANSWER: A transfer valve was partly open
Explanation: The answer is stated in the passage.

QUESTION 119 | MARLIN TEST 14 | READING
Advanced scenario 14-13. Exercise 041. When did the vessel arrive?
Passage:
The vessel arrived at Port Alpha at 0700. Cargo inspection began at 0800 and finished at 1030. All seals were intact. Departure was scheduled for 1400.
Options:
- 1030
- 1400
- 0800
- 0700
CORRECT ANSWER: 0700
Explanation: The answer is stated in the passage.

QUESTION 120 | MARLIN TEST 14 | READING
Advanced scenario 14-07. Exercise 032. What did the engineer do after noticing the leak?
Passage:
The duty engineer noticed a small leak near a pump. He informed the chief engineer, placed a warning sign and isolated the pump. Repairs began when a spare seal arrived.
Options:
- Restarted the pump
- Opened a sea valve
- Informed the chief engineer
- Ignored the leak
CORRECT ANSWER: Informed the chief engineer
Explanation: The answer is stated in the passage.

QUESTION 121 | MARLIN TEST 14 | READING
Advanced scenario 14-04. Exercise 047. Where did the crew report?
Passage:
A fire alarm sounded in the accommodation. Crew followed the emergency plan and reported to muster stations. The fire team wore protective equipment.
Options:
- The engine workshop
- Their muster stations
- The cargo office
- The shore gate
CORRECT ANSWER: Their muster stations
Explanation: The answer is stated in the passage.

QUESTION 122 | MARLIN TEST 15 | READING
Advanced scenario 15-04. Exercise 044. What did the cadet need to learn?
Passage:

A new cadet joined on Tuesday. The safety officer showed her the muster list, escape routes and lifejacket locations. She had to learn her assigned muster station.
Options:
- Her assigned muster station
- The engine serial number
- The cargo invoice
- The port tax rate
CORRECT ANSWER: Her assigned muster station
Explanation: The answer is stated in the passage.

QUESTION 123 | MARLIN TEST 15 | READING
Advanced scenario 15-10. Exercise 051. When did the vessel arrive?
Passage:
The vessel arrived at Port Alpha at 0700. Cargo inspection began at 0800 and finished at 1030. All seals were intact. Departure was scheduled for 1400.
Options:
- 1030
- 0800
- 0700
- 1400
CORRECT ANSWER: 0700
Explanation: The answer is stated in the passage.

QUESTION 124 | MARLIN TEST 15 | READING
Advanced scenario 15-01. Exercise 035. What should happen to plastic waste?
Passage:
The vessel uses separate bins for food waste, plastics and metal. Crew must follow the waste plan. Plastic waste must never be thrown overboard.
Options:
- It should be burned on deck
- It should be mixed with food waste
- It should be kept for proper disposal
- It should be thrown into the sea
CORRECT ANSWER: It should be kept for proper disposal
Explanation: The answer is stated in the passage.

QUESTION 125 | MARLIN TEST 15 | READING
Advanced scenario 15-06. Exercise 046. What was included in the handover?
Passage:
At 1800, the second officer handed over the watch. He explained the vessel’s position, nearby traffic, weather and equipment defects. The incoming officer repeated key details.
Options:
- Only crew leave plans
- Only cargo prices
- Position, traffic, weather and defects
- Only the meal schedule

CORRECT ANSWER: Position, traffic, weather and defects
Explanation: The answer is stated in the passage.

QUESTION 126 | MARLIN TEST 15 | READING
