OCEAN STAR MARINE ACADEMY
PARAGRAPH TITLE SELECTION
Complete active question bank - all tests combined
Includes answer keys and explanations | Questions: 145

QUESTION 1 | MARLIN TEST 1 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 01 (set 6) and select the best title for each.
Passage:
The crew inspects the lifeboat and its launching arrangements. At 2045, the vessel is operating near Mundra.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer checks radar and confirms the ship’s position. At 0600, the vessel is operating near Goa.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer checks the cargo plan before loading begins. At 0730, the vessel is operating near Kandla.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.
Options:
- Lifeboat Readiness
- Bridge Watch
- Cargo Inspection
- Safe Mooring
- Weather Preparation
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Lifeboat Readiness","Bridge Watch","Cargo Inspection"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 2 | MARLIN TEST 1 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 01 (set 1) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 0915, the vessel is operating near Mumbai.
The fire team wears protective clothing and checks its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1145, the vessel is operating near Chennai.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer checks the temperature and pressure of the main engine. At 1430, the vessel is operating near Kochi.

QUESTION 3 | MARLIN TEST 1 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 01 (set 4) and select the best title for each.
Passage:
The crew inspects the lifeboat and its launching arrangements. At 1145, the vessel is operating near Chennai.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer checks radar and confirms the ship’s position. At 1430, the vessel is operating near Kochi.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer checks the cargo plan before loading begins. At 1615, the vessel is operating near Visakhapatnam.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.
Options:
- Lifeboat Readiness
- Bridge Watch
- Cargo Inspection
- Weather Preparation
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Lifeboat Readiness","Bridge Watch","Cargo Inspection"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 4 | MARLIN TEST 1 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 01 (set 3) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 1830, the vessel is operating near Paradip.
The fire team wears protective clothing and checks its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 2045, the vessel is operating near Mundra.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer checks the temperature and pressure of the main engine. At 0600, the vessel is operating near Goa.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

Options:
- Fire Drill

QUESTION 5 | MARLIN TEST 1 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 01 (set 2) and select the best title for each.
Passage:
The navigator corrects charts using the latest official notices. At 1430, the vessel is operating near Kochi.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1615, the vessel is operating near Visakhapatnam.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1830, the vessel is operating near Paradip.
An officer checks the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.
Options:
- Navigation Charts
- Weather Preparation
- Pilot Boarding
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Navigation Charts","Weather Preparation","Pilot Boarding"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 6 | MARLIN TEST 1 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 01 (set 5) and select the best title for each.
Passage:
Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1615, the vessel is operating near Visakhapatnam.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1830, the vessel is operating near Paradip.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 2045, the vessel is operating near Mundra.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures helps prevent avoidable accidents.
Options:
- Safe Mooring
- Pollution Prevention

QUESTION 7 | MARLIN TEST 2 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 02 (set 6) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 1430, the vessel is operating near Chennai.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures helps prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1615, the vessel is operating near Kochi.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1830, the vessel is operating near Visakhapatnam.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.
Options:
- Personal Safety
- Safe Mooring
- Pollution Prevention
- Weather Preparation
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Personal Safety","Safe Mooring","Pollution Prevention"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 8 | MARLIN TEST 2 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 02 (set 3) and select the best title for each.
Passage:
The chief officer checks the cargo plan before loading begins. At 1830, the vessel is operating near Visakhapatnam.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 2045, the vessel is operating near Paradip.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer checks radar and confirms the ship’s position. At 0600, the vessel is operating near Mundra.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

Options:
- Cargo Inspection

QUESTION 9 | MARLIN TEST 2 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 02 (set 5) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 2045, the vessel is operating near Paradip.
An officer checks the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 0600, the vessel is operating near Mundra.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 0730, the vessel is operating near Goa.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.
Options:
- Pilot Boarding
- Navigation Charts
- Weather Preparation
- Bridge Watch
- Engine Room Rounds
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
CORRECT ANSWER: ["Pilot Boarding","Navigation Charts","Weather Preparation"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 10 | MARLIN TEST 2 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 02 (set 1) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 0600, the vessel is operating near Mundra.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures helps prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0730, the vessel is operating near Goa.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 0915, the vessel is operating near Kandla.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Options:
- Personal Safety

QUESTION 11 | MARLIN TEST 2 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 02 (set 4) and select the best title for each.
Passage:
The engineer checks the temperature and pressure of the main engine. At 0730, the vessel is operating near Goa.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 0915, the vessel is operating near Kandla.
The fire team wears protective clothing and checks its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1145, the vessel is operating near Mumbai.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.
Options:
- Engine Room Rounds
- Fire Drill
- Port Arrival
- Weather Preparation
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Engine Room Rounds","Fire Drill","Port Arrival"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 12 | MARLIN TEST 2 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 02 (set 2) and select the best title for each.
Passage:
The engineer checks the temperature and pressure of the main engine. At 1615, the vessel is operating near Kochi.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1830, the vessel is operating near Visakhapatnam.
The fire team wears protective clothing and checks its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 2045, the vessel is operating near Paradip.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

Options:
- Engine Room Rounds

QUESTION 13 | MARLIN TEST 3 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 03 (set 2) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 0600, the vessel is operating near Paradip.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer checks the temperature and pressure of the main engine. At 0730, the vessel is operating near Mundra.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 0915, the vessel is operating near Goa.
The fire team wears protective clothing and checks its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.
Options:
- Port Arrival
- Engine Room Rounds
- Fire Drill
- Bridge Watch
- Safe Mooring
- Weather Preparation
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
CORRECT ANSWER: ["Port Arrival","Engine Room Rounds","Fire Drill"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 14 | MARLIN TEST 3 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 03 (set 4) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 0915, the vessel is operating near Goa.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1145, the vessel is operating near Kandla.
An officer checks the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1430, the vessel is operating near Mumbai.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

Options:
- Weather Preparation

QUESTION 15 | MARLIN TEST 3 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 03 (set 5) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 2045, the vessel is operating near Visakhapatnam.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 0600, the vessel is operating near Paradip.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures helps prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0730, the vessel is operating near Mundra.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.
Options:
- Pollution Prevention
- Personal Safety
- Safe Mooring
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Pollution Prevention","Personal Safety","Safe Mooring"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 16 | MARLIN TEST 3 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 03 (set 3) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 1145, the vessel is operating near Kandla.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1430, the vessel is operating near Mumbai.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures helps prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1615, the vessel is operating near Chennai.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.
Options:
- Pollution Prevention
- Personal Safety
- Safe Mooring

QUESTION 17 | MARLIN TEST 3 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 03 (set 1) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 1830, the vessel is operating near Kochi.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 2045, the vessel is operating near Visakhapatnam.
An officer checks the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 0600, the vessel is operating near Paradip.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.
Options:
- Weather Preparation
- Pilot Boarding
- Navigation Charts
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Weather Preparation","Pilot Boarding","Navigation Charts"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 18 | MARLIN TEST 3 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 03 (set 6) and select the best title for each.
Passage:
The officer checks radar and confirms the ship’s position. At 0730, the vessel is operating near Mundra.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer checks the cargo plan before loading begins. At 0915, the vessel is operating near Goa.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 1145, the vessel is operating near Kandla.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.
Options:
- Bridge Watch
- Cargo Inspection

QUESTION 19 | MARLIN TEST 4 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 04 (set 4) and select the best title for each.
Passage:
Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0915, the vessel is operating near Mundra.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1145, the vessel is operating near Goa.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1430, the vessel is operating near Kandla.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures helps prevent avoidable accidents.
Options:
- Safe Mooring
- Pollution Prevention
- Personal Safety
- Engine Room Rounds
- Weather Preparation
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
CORRECT ANSWER: ["Safe Mooring","Pollution Prevention","Personal Safety"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 20 | MARLIN TEST 4 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 04 (set 2) and select the best title for each.
Passage:
The navigator corrects charts using the latest official notices. At 1615, the vessel is operating near Mumbai.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1830, the vessel is operating near Chennai.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 2045, the vessel is operating near Kochi.
An officer checks the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

Options:
- Navigation Charts

QUESTION 21 | MARLIN TEST 4 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 04 (set 3) and select the best title for each.
Passage:
The crew inspects the lifeboat and its launching arrangements. At 1430, the vessel is operating near Kandla.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer checks radar and confirms the ship’s position. At 1615, the vessel is operating near Mumbai.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer checks the cargo plan before loading begins. At 1830, the vessel is operating near Chennai.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.
Options:
- Lifeboat Readiness
- Bridge Watch
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Lifeboat Readiness","Bridge Watch","Cargo Inspection"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 22 | MARLIN TEST 4 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 04 (set 1) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 1145, the vessel is operating near Goa.
The fire team wears protective clothing and checks its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1430, the vessel is operating near Kandla.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer checks the temperature and pressure of the main engine. At 1615, the vessel is operating near Mumbai.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.
Options:

- Fire Drill
- Port Arrival

QUESTION 23 | MARLIN TEST 4 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 04 (set 5) and select the best title for each.
Passage:
The navigator corrects charts using the latest official notices. At 0730, the vessel is operating near Paradip.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 0915, the vessel is operating near Mundra.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1145, the vessel is operating near Goa.
An officer checks the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.
Options:
- Navigation Charts
- Weather Preparation
- Pilot Boarding
- Bridge Watch
- Engine Room Rounds
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
CORRECT ANSWER: ["Navigation Charts","Weather Preparation","Pilot Boarding"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 24 | MARLIN TEST 4 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 04 (set 6) and select the best title for each.
Passage:
The crew inspects the lifeboat and its launching arrangements. At 0600, the vessel is operating near Visakhapatnam.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer checks radar and confirms the ship’s position. At 0730, the vessel is operating near Paradip.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer checks the cargo plan before loading begins. At 0915, the vessel is operating near Mundra.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

Options:
- Lifeboat Readiness

QUESTION 25 | MARLIN TEST 5 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 05 (set 2) and select the best title for each.
Passage:
The chief officer checks the cargo plan before loading begins. At 2045, the vessel is operating near Chennai.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 0600, the vessel is operating near Kochi.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer checks radar and confirms the ship’s position. At 0730, the vessel is operating near Visakhapatnam.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.
Options:
- Cargo Inspection
- Lifeboat Readiness
- Bridge Watch
- Engine Room Rounds
- Safe Mooring
- Weather Preparation
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
CORRECT ANSWER: ["Cargo Inspection","Lifeboat Readiness","Bridge Watch"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 26 | MARLIN TEST 5 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 05 (set 5) and select the best title for each.
Passage:
The engineer checks the temperature and pressure of the main engine. At 0915, the vessel is operating near Paradip.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1145, the vessel is operating near Mundra.
The fire team wears protective clothing and checks its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1430, the vessel is operating near Goa.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

Options:
- Engine Room Rounds

QUESTION 27 | MARLIN TEST 5 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 05 (set 6) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 1615, the vessel is operating near Kandla.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures helps prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1830, the vessel is operating near Mumbai.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 2045, the vessel is operating near Chennai.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.
Options:
- Personal Safety
- Safe Mooring
- Pollution Prevention
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Personal Safety","Safe Mooring","Pollution Prevention"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 28 | MARLIN TEST 5 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 05 (set 1) and select the best title for each.
Passage:
The chief officer checks the cargo plan before loading begins. At 1145, the vessel is operating near Mundra.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 1430, the vessel is operating near Goa.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer checks radar and confirms the ship’s position. At 1615, the vessel is operating near Kandla.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.
Options:

- Cargo Inspection
- Lifeboat Readiness

QUESTION 29 | MARLIN TEST 5 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 05 (set 3) and select the best title for each.
Passage:
The engineer checks the temperature and pressure of the main engine. At 1830, the vessel is operating near Mumbai.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 2045, the vessel is operating near Chennai.
The fire team wears protective clothing and checks its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 0600, the vessel is operating near Kochi.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.
Options:
- Engine Room Rounds
- Fire Drill
- Port Arrival
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Engine Room Rounds","Fire Drill","Port Arrival"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 30 | MARLIN TEST 5 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 05 (set 4) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 1430, the vessel is operating near Goa.
An officer checks the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1615, the vessel is operating near Kandla.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1830, the vessel is operating near Mumbai.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.
Options:
- Pilot Boarding
- Navigation Charts
- Weather Preparation

QUESTION 31 | MARLIN TEST 6 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 06 (set 7) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 0730, the vessel is operating near Kochi.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer carefully verifies the temperature and pressure of the main engine. At 0915, the vessel is operating near Visakhapatnam.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1145, the vessel is operating near Paradip.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.
Options:
- Port Arrival
- Engine Room Rounds
- Fire Drill
- Safe Mooring
- Weather Preparation
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
- Personal Safety
CORRECT ANSWER: ["Port Arrival","Engine Room Rounds","Fire Drill"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 32 | MARLIN TEST 6 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 06 (set 2) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 0600, the vessel is operating near Chennai.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 0730, the vessel is operating near Kochi.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0915, the vessel is operating near Visakhapatnam.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

Options:
- Pollution Prevention

QUESTION 33 | MARLIN TEST 6 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 06 (set 10) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 1430, the vessel is operating near Mundra.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1615, the vessel is operating near Goa.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1830, the vessel is operating near Kandla.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.
Options:
- Pollution Prevention
- Personal Safety
- Safe Mooring
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Pollution Prevention","Personal Safety","Safe Mooring"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 34 | MARLIN TEST 6 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 06 (set 1) and select the best title for each.
Passage:
The officer carefully verifies radar and confirms the ship’s position. At 0915, the vessel is operating near Visakhapatnam.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer carefully verifies the cargo plan before loading begins. At 1145, the vessel is operating near Paradip.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 1430, the vessel is operating near Mundra.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.
Options:
- Bridge Watch
- Cargo Inspection
- Lifeboat Readiness

QUESTION 35 | MARLIN TEST 6 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 06 (set 3) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 1145, the vessel is operating near Paradip.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1430, the vessel is operating near Mundra.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1615, the vessel is operating near Goa.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.
Options:
- Weather Preparation
- Pilot Boarding
- Navigation Charts
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Weather Preparation","Pilot Boarding","Navigation Charts"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 36 | MARLIN TEST 6 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 06 (set 9) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 1615, the vessel is operating near Goa.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer carefully verifies the temperature and pressure of the main engine. At 1830, the vessel is operating near Kandla.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 2045, the vessel is operating near Mumbai.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.
Options:

- Port Arrival
- Engine Room Rounds

QUESTION 37 | MARLIN TEST 6 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 06 (set 8) and select the best title for each.
Passage:
The officer carefully verifies radar and confirms the ship’s position. At 1830, the vessel is operating near Kandla.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer carefully verifies the cargo plan before loading begins. At 2045, the vessel is operating near Mumbai.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 0600, the vessel is operating near Chennai.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.
Options:
- Bridge Watch
- Cargo Inspection
- Lifeboat Readiness
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Bridge Watch","Cargo Inspection","Lifeboat Readiness"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 38 | MARLIN TEST 6 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 06 (set 6) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 2045, the vessel is operating near Mumbai.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 0600, the vessel is operating near Chennai.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 0730, the vessel is operating near Kochi.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.
Options:

- Weather Preparation
- Pilot Boarding

QUESTION 39 | MARLIN TEST 6 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 06 (set 5) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 1615, the vessel is operating near Goa.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer carefully verifies the temperature and pressure of the main engine. At 1830, the vessel is operating near Kandla.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 2045, the vessel is operating near Mumbai.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.
Options:
- Port Arrival
- Engine Room Rounds
- Fire Drill
- Weather Preparation
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Port Arrival","Engine Room Rounds","Fire Drill"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 40 | MARLIN TEST 6 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 06 (set 4) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 1430, the vessel is operating near Mundra.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1615, the vessel is operating near Goa.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1830, the vessel is operating near Kandla.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

Options:
- Pollution Prevention

QUESTION 41 | MARLIN TEST 7 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 07 (set 3) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 1430, the vessel is operating near Paradip.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1615, the vessel is operating near Mundra.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer carefully verifies the temperature and pressure of the main engine. At 1830, the vessel is operating near Goa.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.
Options:
- Fire Drill
- Port Arrival
- Engine Room Rounds
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Fire Drill","Port Arrival","Engine Room Rounds"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 42 | MARLIN TEST 7 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 07 (set 5) and select the best title for each.
Passage:
Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1145, the vessel is operating near Visakhapatnam.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1430, the vessel is operating near Paradip.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1615, the vessel is operating near Mundra.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.
Options:

- Safe Mooring
- Pollution Prevention

QUESTION 43 | MARLIN TEST 7 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 07 (set 2) and select the best title for each.
Passage:
The navigator corrects charts using the latest official notices. At 0915, the vessel is operating near Kochi.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1145, the vessel is operating near Visakhapatnam.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1430, the vessel is operating near Paradip.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.
Options:
- Navigation Charts
- Weather Preparation
- Pilot Boarding
- Engine Room Rounds
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
CORRECT ANSWER: ["Navigation Charts","Weather Preparation","Pilot Boarding"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 44 | MARLIN TEST 7 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 07 (set 4) and select the best title for each.
Passage:
The crew inspects the lifeboat and its launching arrangements. At 0730, the vessel is operating near Chennai.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer carefully verifies radar and confirms the ship’s position. At 0915, the vessel is operating near Kochi.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer carefully verifies the cargo plan before loading begins. At 1145, the vessel is operating near Visakhapatnam.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

Options:
- Lifeboat Readiness

QUESTION 45 | MARLIN TEST 7 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 07 (set 8) and select the best title for each.
Passage:
The navigator corrects charts using the latest official notices. At 1830, the vessel is operating near Goa.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 2045, the vessel is operating near Kandla.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 0600, the vessel is operating near Mumbai.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.
Options:
- Navigation Charts
- Weather Preparation
- Pilot Boarding
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Navigation Charts","Weather Preparation","Pilot Boarding"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 46 | MARLIN TEST 7 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 07 (set 6) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 0600, the vessel is operating near Mumbai.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 0730, the vessel is operating near Chennai.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer carefully verifies the temperature and pressure of the main engine. At 0915, the vessel is operating near Kochi.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

Options:
- Fire Drill

QUESTION 47 | MARLIN TEST 7 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 07 (set 9) and select the best title for each.
Passage:
Deck ratings prepare the mooring lines before the vessel reaches the berth. At 2045, the vessel is operating near Kandla.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 0600, the vessel is operating near Mumbai.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 0730, the vessel is operating near Chennai.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.
Options:
- Safe Mooring
- Pollution Prevention
- Personal Safety
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Safe Mooring","Pollution Prevention","Personal Safety"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 48 | MARLIN TEST 7 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 07 (set 7) and select the best title for each.
Passage:
Deck ratings prepare the mooring lines before the vessel reaches the berth. At 2045, the vessel is operating near Kandla.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 0600, the vessel is operating near Mumbai.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 0730, the vessel is operating near Chennai.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.
Options:

- Safe Mooring
- Pollution Prevention

QUESTION 49 | MARLIN TEST 7 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 07 (set 10) and select the best title for each.
Passage:
The navigator corrects charts using the latest official notices. At 1830, the vessel is operating near Goa.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 2045, the vessel is operating near Kandla.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 0600, the vessel is operating near Mumbai.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.
Options:
- Navigation Charts
- Weather Preparation
- Pilot Boarding
- Bridge Watch
- Engine Room Rounds
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
CORRECT ANSWER: ["Navigation Charts","Weather Preparation","Pilot Boarding"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 50 | MARLIN TEST 7 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 07 (set 1) and select the best title for each.
Passage:
The crew inspects the lifeboat and its launching arrangements. At 1615, the vessel is operating near Mundra.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer carefully verifies radar and confirms the ship’s position. At 1830, the vessel is operating near Goa.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer carefully verifies the cargo plan before loading begins. At 2045, the vessel is operating near Kandla.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

Options:
- Lifeboat Readiness

QUESTION 51 | MARLIN TEST 8 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 08 (set 3) and select the best title for each.
Passage:
The chief officer carefully verifies the cargo plan before loading begins. At 0600, the vessel is operating near Kandla.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 0730, the vessel is operating near Mumbai.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer carefully verifies radar and confirms the ship’s position. At 0915, the vessel is operating near Chennai.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.
Options:
- Cargo Inspection
- Lifeboat Readiness
- Bridge Watch
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Cargo Inspection","Lifeboat Readiness","Bridge Watch"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 52 | MARLIN TEST 8 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 08 (set 1) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 0915, the vessel is operating near Chennai.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1145, the vessel is operating near Kochi.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1430, the vessel is operating near Visakhapatnam.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.
Options:

- Personal Safety
- Safe Mooring

QUESTION 53 | MARLIN TEST 8 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 08 (set 2) and select the best title for each.
Passage:
The chief officer carefully verifies the cargo plan before loading begins. At 1430, the vessel is operating near Visakhapatnam.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 1615, the vessel is operating near Paradip.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer carefully verifies radar and confirms the ship’s position. At 1830, the vessel is operating near Mundra.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.
Options:
- Cargo Inspection
- Lifeboat Readiness
- Bridge Watch
- Weather Preparation
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Cargo Inspection","Lifeboat Readiness","Bridge Watch"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 54 | MARLIN TEST 8 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 08 (set 8) and select the best title for each.
Passage:
The engineer carefully verifies the temperature and pressure of the main engine. At 1145, the vessel is operating near Kochi.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1430, the vessel is operating near Visakhapatnam.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1615, the vessel is operating near Paradip.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

Options:
- Engine Room Rounds

QUESTION 55 | MARLIN TEST 8 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 08 (set 9) and select the best title for each.
Passage:
The chief officer carefully verifies the cargo plan before loading begins. At 0600, the vessel is operating near Kandla.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 0730, the vessel is operating near Mumbai.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer carefully verifies radar and confirms the ship’s position. At 0915, the vessel is operating near Chennai.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.
Options:
- Cargo Inspection
- Lifeboat Readiness
- Bridge Watch
- Safe Mooring
- Weather Preparation
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Cargo Inspection","Lifeboat Readiness","Bridge Watch"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 56 | MARLIN TEST 8 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 08 (set 4) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 1830, the vessel is operating near Mundra.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 2045, the vessel is operating near Goa.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 0600, the vessel is operating near Kandla.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Options:
- Personal Safety

QUESTION 57 | MARLIN TEST 8 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 08 (set 7) and select the best title for each.
Passage:
The engineer carefully verifies the temperature and pressure of the main engine. At 2045, the vessel is operating near Goa.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 0600, the vessel is operating near Kandla.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 0730, the vessel is operating near Mumbai.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.
Options:
- Engine Room Rounds
- Fire Drill
- Port Arrival
- Bridge Watch
- Safe Mooring
- Weather Preparation
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
CORRECT ANSWER: ["Engine Room Rounds","Fire Drill","Port Arrival"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 58 | MARLIN TEST 8 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 08 (set 6) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 0730, the vessel is operating near Mumbai.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 0915, the vessel is operating near Chennai.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1145, the vessel is operating near Kochi.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

Options:
- Pilot Boarding

QUESTION 59 | MARLIN TEST 8 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 08 (set 10) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 1615, the vessel is operating near Paradip.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1830, the vessel is operating near Mundra.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 2045, the vessel is operating near Goa.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.
Options:
- Pilot Boarding
- Navigation Charts
- Weather Preparation
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Pilot Boarding","Navigation Charts","Weather Preparation"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 60 | MARLIN TEST 8 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 08 (set 5) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 0730, the vessel is operating near Mumbai.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 0915, the vessel is operating near Chennai.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1145, the vessel is operating near Kochi.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.
Options:

- Pilot Boarding
- Navigation Charts

QUESTION 61 | MARLIN TEST 9 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 09 (set 2) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 0730, the vessel is operating near Kandla.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 0915, the vessel is operating near Mumbai.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1145, the vessel is operating near Chennai.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.
Options:
- Pollution Prevention
- Personal Safety
- Safe Mooring
- Engine Room Rounds
- Weather Preparation
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
CORRECT ANSWER: ["Pollution Prevention","Personal Safety","Safe Mooring"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 62 | MARLIN TEST 9 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 09 (set 7) and select the best title for each.
Passage:
The officer carefully verifies radar and confirms the ship’s position. At 1145, the vessel is operating near Chennai.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer carefully verifies the cargo plan before loading begins. At 1430, the vessel is operating near Kochi.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 1615, the vessel is operating near Visakhapatnam.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

Options:
- Bridge Watch

QUESTION 63 | MARLIN TEST 9 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 09 (set 5) and select the best title for each.
Passage:
The officer carefully verifies radar and confirms the ship’s position. At 2045, the vessel is operating near Mundra.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer carefully verifies the cargo plan before loading begins. At 0600, the vessel is operating near Goa.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 0730, the vessel is operating near Kandla.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.
Options:
- Bridge Watch
- Cargo Inspection
- Lifeboat Readiness
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Bridge Watch","Cargo Inspection","Lifeboat Readiness"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 64 | MARLIN TEST 9 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 09 (set 8) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 0915, the vessel is operating near Mumbai.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer carefully verifies the temperature and pressure of the main engine. At 1145, the vessel is operating near Chennai.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1430, the vessel is operating near Kochi.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.
Options:
- Port Arrival
- Engine Room Rounds
- Fire Drill

QUESTION 65 | MARLIN TEST 9 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 09 (set 1) and select the best title for each.
Passage:
The officer carefully verifies radar and confirms the ship’s position. At 1145, the vessel is operating near Chennai.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer carefully verifies the cargo plan before loading begins. At 1430, the vessel is operating near Kochi.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 1615, the vessel is operating near Visakhapatnam.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.
Options:
- Bridge Watch
- Cargo Inspection
- Lifeboat Readiness
- Engine Room Rounds
- Safe Mooring
- Weather Preparation
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
CORRECT ANSWER: ["Bridge Watch","Cargo Inspection","Lifeboat Readiness"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 66 | MARLIN TEST 9 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 09 (set 10) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 1430, the vessel is operating near Kochi.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1615, the vessel is operating near Visakhapatnam.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1830, the vessel is operating near Paradip.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

Options:
- Weather Preparation

QUESTION 67 | MARLIN TEST 9 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 09 (set 6) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 1615, the vessel is operating near Visakhapatnam.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1830, the vessel is operating near Paradip.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 2045, the vessel is operating near Mundra.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.
Options:
- Pollution Prevention
- Personal Safety
- Safe Mooring
- Weather Preparation
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Pollution Prevention","Personal Safety","Safe Mooring"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 68 | MARLIN TEST 9 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 09 (set 4) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 1830, the vessel is operating near Paradip.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer carefully verifies the temperature and pressure of the main engine. At 2045, the vessel is operating near Mundra.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 0600, the vessel is operating near Goa.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

Options:
- Port Arrival

QUESTION 69 | MARLIN TEST 9 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 09 (set 3) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 0600, the vessel is operating near Goa.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 0730, the vessel is operating near Kandla.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 0915, the vessel is operating near Mumbai.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.
Options:
- Weather Preparation
- Pilot Boarding
- Navigation Charts
- Bridge Watch
- Engine Room Rounds
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
CORRECT ANSWER: ["Weather Preparation","Pilot Boarding","Navigation Charts"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 70 | MARLIN TEST 9 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 09 (set 9) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 0915, the vessel is operating near Mumbai.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer carefully verifies the temperature and pressure of the main engine. At 1145, the vessel is operating near Chennai.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1430, the vessel is operating near Kochi.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

Options:
- Port Arrival

QUESTION 71 | MARLIN TEST 10 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 10 (set 3) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 0730, the vessel is operating near Goa.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 0915, the vessel is operating near Kandla.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer carefully verifies the temperature and pressure of the main engine. At 1145, the vessel is operating near Mumbai.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.
Options:
- Fire Drill
- Port Arrival
- Engine Room Rounds
- Bridge Watch
- Safe Mooring
- Weather Preparation
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
CORRECT ANSWER: ["Fire Drill","Port Arrival","Engine Room Rounds"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 72 | MARLIN TEST 10 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 10 (set 1) and select the best title for each.
Passage:
Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1430, the vessel is operating near Chennai.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1615, the vessel is operating near Kochi.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1830, the vessel is operating near Visakhapatnam.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.

Options:
- Safe Mooring

QUESTION 73 | MARLIN TEST 10 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 10 (set 4) and select the best title for each.
Passage:
The navigator corrects charts using the latest official notices. At 1145, the vessel is operating near Mumbai.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1430, the vessel is operating near Chennai.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1615, the vessel is operating near Kochi.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.
Options:
- Navigation Charts
- Weather Preparation
- Pilot Boarding
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Navigation Charts","Weather Preparation","Pilot Boarding"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 74 | MARLIN TEST 10 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 10 (set 10) and select the best title for each.
Passage:
The crew inspects the lifeboat and its launching arrangements. At 0915, the vessel is operating near Kandla.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer carefully verifies radar and confirms the ship’s position. At 1145, the vessel is operating near Mumbai.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer carefully verifies the cargo plan before loading begins. At 1430, the vessel is operating near Chennai.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

Options:
- Lifeboat Readiness

QUESTION 75 | MARLIN TEST 10 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 10 (set 8) and select the best title for each.
Passage:
The navigator corrects charts using the latest official notices. At 2045, the vessel is operating near Paradip.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 0600, the vessel is operating near Mundra.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 0730, the vessel is operating near Goa.
An officer carefully verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.
Options:
- Navigation Charts
- Weather Preparation
- Pilot Boarding
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Navigation Charts","Weather Preparation","Pilot Boarding"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 76 | MARLIN TEST 10 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 10 (set 5) and select the best title for each.
Passage:
The crew inspects the lifeboat and its launching arrangements. At 1830, the vessel is operating near Visakhapatnam.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer carefully verifies radar and confirms the ship’s position. At 2045, the vessel is operating near Paradip.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer carefully verifies the cargo plan before loading begins. At 0600, the vessel is operating near Mundra.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.
Options:

- Lifeboat Readiness
- Bridge Watch

QUESTION 77 | MARLIN TEST 10 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 10 (set 7) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 1615, the vessel is operating near Kochi.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1830, the vessel is operating near Visakhapatnam.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer carefully verifies the temperature and pressure of the main engine. At 2045, the vessel is operating near Paradip.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.
Options:
- Fire Drill
- Port Arrival
- Engine Room Rounds
- Safe Mooring
- Weather Preparation
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
- Personal Safety
CORRECT ANSWER: ["Fire Drill","Port Arrival","Engine Room Rounds"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 78 | MARLIN TEST 10 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 10 (set 2) and select the best title for each.
Passage:
Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1430, the vessel is operating near Chennai.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1615, the vessel is operating near Kochi.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1830, the vessel is operating near Visakhapatnam.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.

Options:
- Safe Mooring

QUESTION 79 | MARLIN TEST 10 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 10 (set 6) and select the best title for each.
Passage:
Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0600, the vessel is operating near Mundra.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 0730, the vessel is operating near Goa.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 0915, the vessel is operating near Kandla.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures supports prevent avoidable accidents.
Options:
- Safe Mooring
- Pollution Prevention
- Personal Safety
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Safe Mooring","Pollution Prevention","Personal Safety"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 80 | MARLIN TEST 10 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 10 (set 9) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 1615, the vessel is operating near Kochi.
The fire team wears protective clothing and carefully verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1830, the vessel is operating near Visakhapatnam.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer carefully verifies the temperature and pressure of the main engine. At 2045, the vessel is operating near Paradip.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.
Options:
- Fire Drill

- Port Arrival
- Engine Room Rounds

QUESTION 81 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 1) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 2045, the vessel is operating near Visakhapatnam.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0600, the vessel is operating near Paradip.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 0730, the vessel is operating near Mundra.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.
Options:
- Personal Safety
- Safe Mooring
- Pollution Prevention
- Weather Preparation
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Personal Safety","Safe Mooring","Pollution Prevention"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 82 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 3) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 0915, the vessel is operating near Goa.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1145, the vessel is operating near Kandla.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1430, the vessel is operating near Mumbai.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

Options:
- Pilot Boarding

QUESTION 83 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 10) and select the best title for each.
Passage:
The chief officer systematically verifies the cargo plan before loading begins. At 0730, the vessel is operating near Mundra.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 0915, the vessel is operating near Goa.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer systematically verifies radar and confirms the ship’s position. At 1145, the vessel is operating near Kandla.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.
Options:
- Cargo Inspection
- Lifeboat Readiness
- Bridge Watch
- Weather Preparation
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Cargo Inspection","Lifeboat Readiness","Bridge Watch"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 84 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 7) and select the best title for each.
Passage:
The engineer systematically verifies the temperature and pressure of the main engine. At 0600, the vessel is operating near Paradip.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 0730, the vessel is operating near Mundra.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 0915, the vessel is operating near Goa.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

Options:
- Engine Room Rounds

QUESTION 85 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 5) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 2045, the vessel is operating near Visakhapatnam.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0600, the vessel is operating near Paradip.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 0730, the vessel is operating near Mundra.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.
Options:
- Personal Safety
- Safe Mooring
- Pollution Prevention
- Bridge Watch
- Engine Room Rounds
- Weather Preparation
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
CORRECT ANSWER: ["Personal Safety","Safe Mooring","Pollution Prevention"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 86 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 13) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 1830, the vessel is operating near Kochi.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 2045, the vessel is operating near Visakhapatnam.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 0600, the vessel is operating near Paradip.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

Options:
- Pilot Boarding

QUESTION 87 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 2) and select the best title for each.
Passage:
The chief officer systematically verifies the cargo plan before loading begins. At 1615, the vessel is operating near Chennai.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 1830, the vessel is operating near Kochi.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer systematically verifies radar and confirms the ship’s position. At 2045, the vessel is operating near Visakhapatnam.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.
Options:
- Cargo Inspection
- Lifeboat Readiness
- Bridge Watch
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Cargo Inspection","Lifeboat Readiness","Bridge Watch"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 88 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 8) and select the best title for each.
Passage:
The chief officer systematically verifies the cargo plan before loading begins. At 0730, the vessel is operating near Mundra.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 0915, the vessel is operating near Goa.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer systematically verifies radar and confirms the ship’s position. At 1145, the vessel is operating near Kandla.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.
Options:

- Cargo Inspection
- Lifeboat Readiness

QUESTION 89 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 4) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 1830, the vessel is operating near Kochi.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 2045, the vessel is operating near Visakhapatnam.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 0600, the vessel is operating near Paradip.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.
Options:
- Pilot Boarding
- Navigation Charts
- Weather Preparation
- Engine Room Rounds
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
CORRECT ANSWER: ["Pilot Boarding","Navigation Charts","Weather Preparation"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 90 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 9) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 1145, the vessel is operating near Kandla.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1430, the vessel is operating near Mumbai.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1615, the vessel is operating near Chennai.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Options:
- Personal Safety

QUESTION 91 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 11) and select the best title for each.
Passage:
The engineer systematically verifies the temperature and pressure of the main engine. At 1430, the vessel is operating near Mumbai.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1615, the vessel is operating near Chennai.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1830, the vessel is operating near Kochi.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.
Options:
- Engine Room Rounds
- Fire Drill
- Port Arrival
- Weather Preparation
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Engine Room Rounds","Fire Drill","Port Arrival"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 92 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 12) and select the best title for each.
Passage:
The engineer systematically verifies the temperature and pressure of the main engine. At 0600, the vessel is operating near Paradip.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 0730, the vessel is operating near Mundra.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 0915, the vessel is operating near Goa.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

Options:
- Engine Room Rounds

QUESTION 93 | MARLIN TEST 11 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 11 (set 6) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 0915, the vessel is operating near Goa.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1145, the vessel is operating near Kandla.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1430, the vessel is operating near Mumbai.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.
Options:
- Pilot Boarding
- Navigation Charts
- Weather Preparation
- Bridge Watch
- Engine Room Rounds
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
CORRECT ANSWER: ["Pilot Boarding","Navigation Charts","Weather Preparation"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 94 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 13) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 0730, the vessel is operating near Paradip.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 0915, the vessel is operating near Mundra.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1145, the vessel is operating near Goa.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

Options:
- Weather Preparation

QUESTION 95 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 3) and select the best title for each.
Passage:
The officer systematically verifies radar and confirms the ship’s position. At 1430, the vessel is operating near Kandla.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer systematically verifies the cargo plan before loading begins. At 1615, the vessel is operating near Mumbai.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 1830, the vessel is operating near Chennai.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.
Options:
- Bridge Watch
- Cargo Inspection
- Lifeboat Readiness
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Bridge Watch","Cargo Inspection","Lifeboat Readiness"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 96 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 8) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 1145, the vessel is operating near Goa.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer systematically verifies the temperature and pressure of the main engine. At 1430, the vessel is operating near Kandla.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1615, the vessel is operating near Mumbai.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.
Options:
- Port Arrival
- Engine Room Rounds
- Fire Drill

QUESTION 97 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 4) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 0915, the vessel is operating near Mundra.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1145, the vessel is operating near Goa.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1430, the vessel is operating near Kandla.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.
Options:
- Pollution Prevention
- Personal Safety
- Safe Mooring
- Weather Preparation
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Pollution Prevention","Personal Safety","Safe Mooring"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 98 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 12) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 0730, the vessel is operating near Paradip.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 0915, the vessel is operating near Mundra.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1145, the vessel is operating near Goa.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

Options:
- Weather Preparation

QUESTION 99 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 11) and select the best title for each.
Passage:
The officer systematically verifies radar and confirms the ship’s position. At 0600, the vessel is operating near Visakhapatnam.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer systematically verifies the cargo plan before loading begins. At 0730, the vessel is operating near Paradip.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 0915, the vessel is operating near Mundra.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.
Options:
- Bridge Watch
- Cargo Inspection
- Lifeboat Readiness
- Engine Room Rounds
- Safe Mooring
- Weather Preparation
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
CORRECT ANSWER: ["Bridge Watch","Cargo Inspection","Lifeboat Readiness"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 100 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 6) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 2045, the vessel is operating near Kochi.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer systematically verifies the temperature and pressure of the main engine. At 0600, the vessel is operating near Visakhapatnam.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 0730, the vessel is operating near Paradip.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

Options:
- Port Arrival

QUESTION 101 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 9) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 1830, the vessel is operating near Chennai.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 2045, the vessel is operating near Kochi.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0600, the vessel is operating near Visakhapatnam.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.
Options:
- Pollution Prevention
- Personal Safety
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Pollution Prevention","Personal Safety","Safe Mooring"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 102 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 2) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 1615, the vessel is operating near Mumbai.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1830, the vessel is operating near Chennai.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 2045, the vessel is operating near Kochi.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.
Options:
- Weather Preparation
- Pilot Boarding

QUESTION 103 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 5) and select the best title for each.
Passage:
The officer systematically verifies radar and confirms the ship’s position. At 1430, the vessel is operating near Kandla.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer systematically verifies the cargo plan before loading begins. At 1615, the vessel is operating near Mumbai.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 1830, the vessel is operating near Chennai.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.
Options:
- Bridge Watch
- Cargo Inspection
- Lifeboat Readiness
- Safe Mooring
- Weather Preparation
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Bridge Watch","Cargo Inspection","Lifeboat Readiness"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 104 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 1) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 1145, the vessel is operating near Goa.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer systematically verifies the temperature and pressure of the main engine. At 1430, the vessel is operating near Kandla.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1615, the vessel is operating near Mumbai.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

Options:
- Port Arrival

QUESTION 105 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 7) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 0915, the vessel is operating near Mundra.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1145, the vessel is operating near Goa.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1430, the vessel is operating near Kandla.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.
Options:
- Pollution Prevention
- Personal Safety
- Safe Mooring
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Pollution Prevention","Personal Safety","Safe Mooring"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 106 | MARLIN TEST 12 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 12 (set 10) and select the best title for each.
Passage:
The officer systematically verifies radar and confirms the ship’s position. At 0600, the vessel is operating near Visakhapatnam.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer systematically verifies the cargo plan before loading begins. At 0730, the vessel is operating near Paradip.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 0915, the vessel is operating near Mundra.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.
Options:
- Bridge Watch
- Cargo Inspection
- Lifeboat Readiness

QUESTION 107 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 2) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 0915, the vessel is operating near Paradip.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1145, the vessel is operating near Mundra.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer systematically verifies the temperature and pressure of the main engine. At 1430, the vessel is operating near Goa.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.
Options:
- Fire Drill
- Port Arrival
- Engine Room Rounds
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Fire Drill","Port Arrival","Engine Room Rounds"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 108 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 1) and select the best title for each.
Passage:
The crew inspects the lifeboat and its launching arrangements. At 1145, the vessel is operating near Mundra.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer systematically verifies radar and confirms the ship’s position. At 1430, the vessel is operating near Goa.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer systematically verifies the cargo plan before loading begins. At 1615, the vessel is operating near Kandla.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.
Options:
- Lifeboat Readiness
- Bridge Watch

QUESTION 109 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 12) and select the best title for each.
Passage:
The navigator corrects charts using the latest official notices. At 1430, the vessel is operating near Goa.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1615, the vessel is operating near Kandla.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1830, the vessel is operating near Mumbai.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.
Options:
- Navigation Charts
- Weather Preparation
- Pilot Boarding
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Navigation Charts","Weather Preparation","Pilot Boarding"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 110 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 9) and select the best title for each.
Passage:
Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1615, the vessel is operating near Kandla.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1830, the vessel is operating near Mumbai.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 2045, the vessel is operating near Chennai.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.
Options:
- Safe Mooring
- Pollution Prevention

QUESTION 111 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 7) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 1830, the vessel is operating near Mumbai.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 2045, the vessel is operating near Chennai.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer systematically verifies the temperature and pressure of the main engine. At 0600, the vessel is operating near Kochi.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.
Options:
- Fire Drill
- Port Arrival
- Engine Room Rounds
- Bridge Watch
- Safe Mooring
- Weather Preparation
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
CORRECT ANSWER: ["Fire Drill","Port Arrival","Engine Room Rounds"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 112 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 13) and select the best title for each.
Passage:
Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0730, the vessel is operating near Visakhapatnam.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 0915, the vessel is operating near Paradip.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1145, the vessel is operating near Mundra.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Options:
- Safe Mooring

QUESTION 113 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 4) and select the best title for each.
Passage:
The crew inspects the lifeboat and its launching arrangements. At 1145, the vessel is operating near Mundra.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer systematically verifies radar and confirms the ship’s position. At 1430, the vessel is operating near Goa.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer systematically verifies the cargo plan before loading begins. At 1615, the vessel is operating near Kandla.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.
Options:
- Lifeboat Readiness
- Bridge Watch
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Lifeboat Readiness","Bridge Watch","Cargo Inspection"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 114 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 10) and select the best title for each.
Passage:
The crew inspects the lifeboat and its launching arrangements. At 2045, the vessel is operating near Chennai.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer systematically verifies radar and confirms the ship’s position. At 0600, the vessel is operating near Kochi.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer systematically verifies the cargo plan before loading begins. At 0730, the vessel is operating near Visakhapatnam.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.
Options:
- Lifeboat Readiness
- Bridge Watch
- Cargo Inspection

QUESTION 115 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 5) and select the best title for each.
Passage:
The navigator corrects charts using the latest official notices. At 0600, the vessel is operating near Kochi.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 0730, the vessel is operating near Visakhapatnam.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 0915, the vessel is operating near Paradip.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.
Options:
- Navigation Charts
- Weather Preparation
- Pilot Boarding
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Navigation Charts","Weather Preparation","Pilot Boarding"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 116 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 3) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 0915, the vessel is operating near Paradip.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1145, the vessel is operating near Mundra.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer systematically verifies the temperature and pressure of the main engine. At 1430, the vessel is operating near Goa.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.
Options:
- Fire Drill
- Port Arrival
- Engine Room Rounds

QUESTION 117 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 11) and select the best title for each.
Passage:
Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1615, the vessel is operating near Kandla.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1830, the vessel is operating near Mumbai.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 2045, the vessel is operating near Chennai.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.
Options:
- Safe Mooring
- Pollution Prevention
- Personal Safety
- Engine Room Rounds
- Weather Preparation
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
CORRECT ANSWER: ["Safe Mooring","Pollution Prevention","Personal Safety"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 118 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 8) and select the best title for each.
Passage:
The alarm sounds and crew members proceed to assigned stations. At 1830, the vessel is operating near Mumbai.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 2045, the vessel is operating near Chennai.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer systematically verifies the temperature and pressure of the main engine. At 0600, the vessel is operating near Kochi.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

Options:
- Fire Drill

QUESTION 119 | MARLIN TEST 13 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 13 (set 6) and select the best title for each.
Passage:
The navigator corrects charts using the latest official notices. At 1430, the vessel is operating near Goa.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1615, the vessel is operating near Kandla.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1830, the vessel is operating near Mumbai.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.
Options:
- Navigation Charts
- Weather Preparation
- Pilot Boarding
- Bridge Watch
- Engine Room Rounds
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
CORRECT ANSWER: ["Navigation Charts","Weather Preparation","Pilot Boarding"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 120 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 8) and select the best title for each.
Passage:
The engineer systematically verifies the temperature and pressure of the main engine. At 1615, the vessel is operating near Goa.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1830, the vessel is operating near Kandla.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 2045, the vessel is operating near Mumbai.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

Options:
- Engine Room Rounds

QUESTION 121 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 9) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 2045, the vessel is operating near Mumbai.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 0600, the vessel is operating near Chennai.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 0730, the vessel is operating near Kochi.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.
Options:
- Pilot Boarding
- Navigation Charts
- Weather Preparation
- Bridge Watch
- Engine Room Rounds
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
CORRECT ANSWER: ["Pilot Boarding","Navigation Charts","Weather Preparation"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 122 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 11) and select the best title for each.
Passage:
The chief officer systematically verifies the cargo plan before loading begins. At 1830, the vessel is operating near Kandla.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 2045, the vessel is operating near Mumbai.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer systematically verifies radar and confirms the ship’s position. At 0600, the vessel is operating near Chennai.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

Options:
- Cargo Inspection

QUESTION 123 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 4) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 1430, the vessel is operating near Mundra.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1615, the vessel is operating near Goa.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1830, the vessel is operating near Kandla.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.
Options:
- Personal Safety
- Safe Mooring
- Pollution Prevention
- Weather Preparation
- Cargo Inspection
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Personal Safety","Safe Mooring","Pollution Prevention"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 124 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 12) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 0600, the vessel is operating near Chennai.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0730, the vessel is operating near Kochi.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 0915, the vessel is operating near Visakhapatnam.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Options:
- Personal Safety

QUESTION 125 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 10) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 1145, the vessel is operating near Paradip.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1430, the vessel is operating near Mundra.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 1615, the vessel is operating near Goa.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.
Options:
- Pilot Boarding
- Navigation Charts
- Weather Preparation
- Engine Room Rounds
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
CORRECT ANSWER: ["Pilot Boarding","Navigation Charts","Weather Preparation"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 126 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 2) and select the best title for each.
Passage:
The chief officer systematically verifies the cargo plan before loading begins. At 0915, the vessel is operating near Visakhapatnam.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 1145, the vessel is operating near Paradip.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer systematically verifies radar and confirms the ship’s position. At 1430, the vessel is operating near Mundra.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

Options:
- Cargo Inspection

QUESTION 127 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 6) and select the best title for each.
Passage:
The engineer systematically verifies the temperature and pressure of the main engine. At 0730, the vessel is operating near Kochi.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 0915, the vessel is operating near Visakhapatnam.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 1145, the vessel is operating near Paradip.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.
Options:
- Engine Room Rounds
- Fire Drill
- Port Arrival
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
- Personal Safety
- Navigation Charts
CORRECT ANSWER: ["Engine Room Rounds","Fire Drill","Port Arrival"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 128 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 5) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 0600, the vessel is operating near Chennai.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0730, the vessel is operating near Kochi.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 0915, the vessel is operating near Visakhapatnam.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.
Options:
- Personal Safety
- Safe Mooring
- Pollution Prevention

QUESTION 129 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 13) and select the best title for each.
Passage:
The deck team prepares the pilot ladder on the correct side. At 2045, the vessel is operating near Mumbai.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 0600, the vessel is operating near Chennai.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.

The master receives a forecast before the ship begins its passage. At 0730, the vessel is operating near Kochi.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.
Options:
- Pilot Boarding
- Navigation Charts
- Weather Preparation
- Safe Mooring
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Pilot Boarding","Navigation Charts","Weather Preparation"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 130 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 7) and select the best title for each.
Passage:
The chief officer systematically verifies the cargo plan before loading begins. At 1830, the vessel is operating near Kandla.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 2045, the vessel is operating near Mumbai.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.

The officer systematically verifies radar and confirms the ship’s position. At 0600, the vessel is operating near Chennai.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

Options:
- Cargo Inspection

QUESTION 131 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 1) and select the best title for each.
Passage:
The engineer systematically verifies the temperature and pressure of the main engine. At 1615, the vessel is operating near Goa.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1830, the vessel is operating near Kandla.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

The bridge team contacts port control before entering the harbour. At 2045, the vessel is operating near Mumbai.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.
Options:
- Engine Room Rounds
- Fire Drill
- Port Arrival
- Bridge Watch
- Safe Mooring
- Weather Preparation
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
CORRECT ANSWER: ["Engine Room Rounds","Fire Drill","Port Arrival"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 132 | MARLIN TEST 14 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 14 (set 3) and select the best title for each.
Passage:
Crew members wear suitable protective equipment for each task. At 1430, the vessel is operating near Mundra.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1615, the vessel is operating near Goa.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

The crew keeps oil residues inside approved collection tanks. At 1830, the vessel is operating near Kandla.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Options:
- Personal Safety

QUESTION 133 | MARLIN TEST 15 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 15 (set 12) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 2045, the vessel is operating near Kandla.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 0600, the vessel is operating near Mumbai.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 0730, the vessel is operating near Chennai.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.
Options:
- Pollution Prevention
- Personal Safety
- Safe Mooring
- Fire Drill
- Pilot Boarding
- Lifeboat Readiness
- Port Arrival
- Navigation Charts
CORRECT ANSWER: ["Pollution Prevention","Personal Safety","Safe Mooring"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 134 | MARLIN TEST 15 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 15 (set 5) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 0915, the vessel is operating near Kochi.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1145, the vessel is operating near Visakhapatnam.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1430, the vessel is operating near Paradip.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.
Options:
- Weather Preparation
- Pilot Boarding
- Navigation Charts

QUESTION 135 | MARLIN TEST 15 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 15 (set 3) and select the best title for each.
Passage:
The officer systematically verifies radar and confirms the ship’s position. At 0730, the vessel is operating near Chennai.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer systematically verifies the cargo plan before loading begins. At 0915, the vessel is operating near Kochi.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 1145, the vessel is operating near Visakhapatnam.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.
Options:
- Bridge Watch
- Cargo Inspection
- Lifeboat Readiness
- Safe Mooring
- Weather Preparation
- Fire Drill
- Pollution Prevention
- Pilot Boarding
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Bridge Watch","Cargo Inspection","Lifeboat Readiness"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 136 | MARLIN TEST 15 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 15 (set 4) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 0600, the vessel is operating near Mumbai.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer systematically verifies the temperature and pressure of the main engine. At 0730, the vessel is operating near Chennai.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 0915, the vessel is operating near Kochi.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.

Options:
- Port Arrival

QUESTION 137 | MARLIN TEST 15 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 15 (set 13) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 1830, the vessel is operating near Goa.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 2045, the vessel is operating near Kandla.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 0600, the vessel is operating near Mumbai.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.
Options:
- Weather Preparation
- Pilot Boarding
- Navigation Charts
- Cargo Inspection
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Weather Preparation","Pilot Boarding","Navigation Charts"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 138 | MARLIN TEST 15 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 15 (set 9) and select the best title for each.
Passage:
The officer systematically verifies radar and confirms the ship’s position. At 1615, the vessel is operating near Mundra.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer systematically verifies the cargo plan before loading begins. At 1830, the vessel is operating near Goa.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.

The crew inspects the lifeboat and its launching arrangements. At 2045, the vessel is operating near Kandla.
Food, water and emergency supplies are checked regularly.
The assigned team practises boarding and securing safety belts.
Frequent inspections keep survival craft ready for use.
Options:
- Bridge Watch
- Cargo Inspection

QUESTION 139 | MARLIN TEST 15 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 15 (set 10) and select the best title for each.
Passage:
The bridge team contacts port control before entering the harbour. At 1430, the vessel is operating near Paradip.
The crew confirms the arrival checklist and prepares documents.
Tugs may assist the vessel as it approaches the assigned berth.
Good coordination makes arrival safer and more efficient.

The engineer systematically verifies the temperature and pressure of the main engine. At 1615, the vessel is operating near Mundra.
Pumps and generators are inspected during the routine round.
Unusual vibration or noise is reported without delay.
Accurate records help prevent equipment failure.

The alarm sounds and crew members proceed to assigned stations. At 1830, the vessel is operating near Goa.
The fire team wears protective clothing and systematically verifies its equipment.
A boundary cooling team prepares hoses near the affected area.
Regular drills help everyone respond calmly during an emergency.
Options:
- Port Arrival
- Engine Room Rounds
- Fire Drill
- Safe Mooring
- Weather Preparation
- Cargo Inspection
- Pollution Prevention
- Pilot Boarding
- Lifeboat Readiness
- Personal Safety
CORRECT ANSWER: ["Port Arrival","Engine Room Rounds","Fire Drill"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 140 | MARLIN TEST 15 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 15 (set 6) and select the best title for each.
Passage:
The crew keeps oil residues inside approved collection tanks. At 1145, the vessel is operating near Visakhapatnam.
Garbage is separated and stored according to shipboard procedures.
Waste is not discharged into the sea unless regulations permit it.
Good housekeeping protects the marine environment.

Crew members wear suitable protective equipment for each task. At 1430, the vessel is operating near Paradip.
Hazards are discussed before maintenance or lifting work begins.
A safe working area is kept clear of unnecessary materials.
Following procedures contributes to prevent avoidable accidents.

Deck ratings prepare the mooring lines before the vessel reaches the berth. At 1615, the vessel is operating near Mundra.
The team stays clear of snap-back zones while handling ropes.
The officer gives clear orders as each line is secured.
Careful mooring protects the crew and the vessel.

Options:
- Pollution Prevention

QUESTION 141 | MARLIN TEST 15 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 15 (set 2) and select the best title for each.
Passage:
The master receives a forecast before the ship begins its passage. At 0915, the vessel is operating near Kochi.
Strong winds and heavy seas may require a route change.
The crew secures loose equipment before conditions worsen.
Early preparation reduces the risk of damage and injury.

The deck team prepares the pilot ladder on the correct side. At 1145, the vessel is operating near Visakhapatnam.
An officer systematically verifies the ladder and nearby safety equipment.
The vessel maintains a safe speed while the pilot approaches.
The bridge team welcomes the pilot and exchanges essential information.

The navigator corrects charts using the latest official notices. At 1430, the vessel is operating near Paradip.
Depths, buoys and restricted areas are checked before departure.
The planned route is reviewed for hazards and safe clearance.
Updated charts support accurate and responsible navigation.
Options:
- Weather Preparation
- Pilot Boarding
- Navigation Charts
- Fire Drill
- Pollution Prevention
- Lifeboat Readiness
- Port Arrival
- Personal Safety
CORRECT ANSWER: ["Weather Preparation","Pilot Boarding","Navigation Charts"]
Explanation: Select the title that expresses the main idea of each paragraph.

QUESTION 142 | MARLIN TEST 15 | PARAGRAPH TITLE
Read the three four-line paragraphs in Marlin Test 15 (set 8) and select the best title for each.
Passage:
The officer systematically verifies radar and confirms the ship’s position. At 0730, the vessel is operating near Chennai.
The lookout scans the horizon and reports nearby traffic.
The bridge team compares the chart with navigational information.
Clear communication keeps the vessel on a safe course.

The chief officer systematically verifies the cargo plan before loading begins. At 0915, the vessel is operating near Kochi.
Each package is examined for damage and correct identification.
The crew distributes weight according to the approved plan.
Proper stowage keeps cargo stable throughout the voyage.
